☎ +91 6395835710

📍 Almora, Uttarakhand

Hard Skill

- Full-stack development
- Data-driven decision-making
- System architecture design
- Proficient in advanced programming languages (e.g., Java, Python)

Soft Skill

- Strong communication
- Collaborative problem-solving
- Adaptability
- Teamwork
- Continuous learning

Education Background

- Graphic Era Hill University , Dehradun
Bachelor in Technology (CSE)
Present
CGPA: 8.9
- Army Public School, Ranikhet
Intermediate
Completed in 2020
CGPA: 9.34
- Army Public School, Ranikhet
Secondary school
Completed in 2018
CGPA: 9.2

About Me

Third-year BTech software engineering student with one year of programming experience, adept in computer science fundamentals, seeking a internship to contribute to innovative software solutions and leverage a growth mindset.

Projects

Health Notifier

- Developed a Health Notifier utilizing Support Vector Machines (SVM) for accurate health predictions. Applied machine learning algorithms to analyze health data, enabling timely notifications and proactive health management.

Credit Card Fraud Detection

- Implemented a Credit Card Fraud Detection system using machine learning, employing algorithms like Random Forest and Logistic Regression. Developed predictive models to analyze transaction patterns, enhancing fraud detection accuracy and reducing financial risks.

Handwritten Digit Recognition

- Developed a machine learning model capable of accurately recognizing handwritten digits from a variety of sources, including scanned documents and touchscreens.

Blockchain Based Chat Application

- Developed a secure and decentralized chat application that leverages blockchain technology to ensure the privacy and security of user communications

Achievements

2023-2024 Secure First Postition in 24 Hours Hackathon
